Overview

- HST MIT PhD candidate in RLE & CSAIL.
- Research interests in machine learning, (convex) optimization, representation learning, generalization, data augmentation, and reinforcement learning.

Education

Massachusetts Institute of Technology
Ph.D. HST (Computer Science)

2023 – May 2028 (*Expected*)
GPA: 5.00 / 5.00

University of Arizona
B.S. in Biomedical Engineering; Minor in Mathematics

2019 – 2023
GPA: 3.95 / 4.00

Industry Experience

Machine Learning Research, Stealth Startup
Kendall Square, Cambridge, MA

May 2026 – Sept. 2026

- Post-training V/LLM research in non-verifiable RL settings.

Fellowships and Awards

Graduate Research Fellowship Program, National Science Foundation	2024
MathWorks Graduate Fellow, MathWorks	2024
School of Engineering – Distinguished Graduate Student Fellow, MIT	2023
Program for Exemplary Mentoring Fellow, MIT	2023
Goldwater STEM Scholarship, Goldwater Foundation	2022
Sophomore of the Year, University of Arizona	2021
Native Health Care Scholar, Udall Foundation	2021

Publications

Work

Rodriguez, John Heusinkveld, Ie-Ming Shih, David S. Alberts, Jennifer K. Barton. “Sub-Millimeter Endoscope Demonstrates Feasibility of In Vivo Reflectance Imaging, Fluorescence Imaging, and Cell Collection in the Fallopian Tubes”. *Journal of Biomedical Optics*, 2021.

Invited Talks

Learning Alongside Invariant Representations: Robust Generalization in Medical Imaging
MIT IMES Department Retreat, Boston, MA Sept. 29, 2025

RepreSeg: Stable Representations for Domain Generalized Segmentation
MIT IMES Seminar, Cambridge, MA Dec. 12, 2025

Relevant Coursework

MIT Deep Learning, Numerical Methods, Computer Vision, fMRI Neuroscience
Harvard Medical School Pathology, Immunology, Genetics, Cardiovascular & Pulmonary Pathophysiology

Skills

Programming Python, PyTorch, C++
Technical Numerical optimization, probability

Service

Reviewer, MICCAI: PIPPI 2025-26
Reviewer, CVPR 2026
Reviewer, NeurIPS 2027
